Programme Directors:
Professor KY Yuen
Professor Lin Chia-Chin
The purpose of these series of courses is to provide knowledge and practical experience in infection control measures, through an interactive and problem-solving approach in learning, for clinicians, nurses, allied health professionals, and other healthcare workers who are interested or actively involved in the daily management of hospital infection control.

A series of SIX modules will be organized as follows:

- **Module 1 - Importance of Infection Control I**  
  Structure, Science and Outlook
- **Module 2 - Important of Infection Control II**  
  Emergence of Multiple Drug Resistant Organisms
- **Module 3 - Infection Control in Practice I**  
  Nosocomial Infections Prevention and Control
- **Module 4 - Infection Control in Practice II**  
  Prevention and Control of Infection in Special Patient Population
- **Module 5 - Advancing Infection Control I**  
  Understanding of Infections related to Hospital Support Service
- **Module 6 - Advancing Infection Control II**  
  Emergency Infectious Diseases and Future Challenge

*Lectures are taught in English and Cantonese*

*CNE points will be awarded to nursing candidates on completion of each module*

**Excellent rating from past participants**
