Master of Nursing

Paediatric Nursing Track

Occasional Student Enrollment (2026-2027)

The Master of Nursing (MNurs) Programme offers different study tracks in advancing students' career in different nursing specialties. The **Paediatric Nursing Track** is developed in close consultation with clinical partners and professional association with an aim to prepare nurses for advanced nursing practice in paediatric field.

Registered Nurses who are keen to advance their knowledge and skills in paediatric nursing are welcome to take the following courses as Occasional Students

NURS8270 Paediatric Cardiac Nursing

Course for Occasional Students (Semester 1, 2026-27)

This course focuses on the latest evidence and advanced nursing practice related to congenital heart conditions in paediatric patients. The course explores advanced knowledge, clinical management, and inter-professional approach in caring paediatric patients with heart disease. Special attention will be given to current interventional and surgical management of heart defects. The course will also explore the knowledge and clinical applications of mechanical circulatory support and perfusion in paediatric patients.

Date:
September 12, October 10, November 7 & 28, 2026
(Saturday, 09:00 – 18:00)

NURS8268 Child and Adolescent Health Nursing

Course for Occasional Students (Semester 2A, 2026-27)

This course examines the developmental stages and individual needs of the child and adolescent, as well as contemporary health issues related to child and adolescent. Growth and development of infants, children and adolescents; health assessment and health issues from regional and global perspectives are addressed to broaden the scope and understanding of child health.

Tentative Date:
January 20 - April 28, 2027
(Wednesday, 18:00 – 21:00)

Application:
